## Introduction

The following action plans is the collective work of the eight priority action groups, who were established to deliver the Rother Community Plan, which was published in November 2004.

Each of the eight groups have been working within their action groups to pull together their action plans, which are in response to the comments made by the public to the "Tell Us What You Think Community Consultation" in 2002, the Draft Community Plan in 2004 and issues arising from Local Action Plans.

The template used for the action plans is based on the following publication:

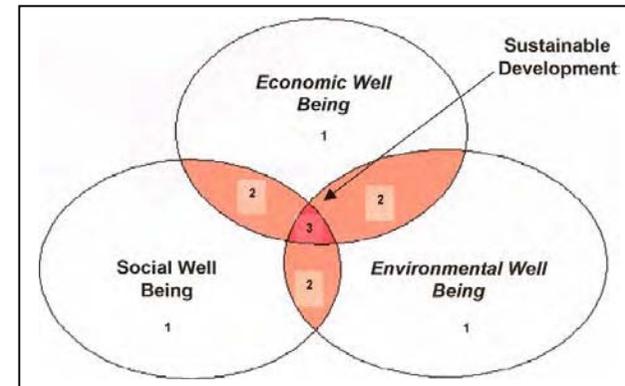

*Performance Management Framework*  
*Local Strategic Partnerships*  
*The NRU Model – Draft*  
*A suggested approach - ODPM & NRU*

The following notes were used to assist the action groups in completing their plans:

- **Progress on** – the issue that is being reviewed (i.e. education, health, housing and any LSP specific themes).
- **Other partners or people involved** – any other organisations or people involved in the planning.
- **Strategic Objective** – the overall objective that the action group is aiming to meet as stated in the template.
- **Target** – an individual target forming part of an overall objective.
- **Baseline** – the action group's starting position.
- **Target for the current year** – what the action group is aiming to achieve.
- **Actual** – what the action group has achieved at the time of the review.

- **Next Milestone and date** – what the action group plan to achieve by when.
- **Activity/Evidence?** – What the action group is doing to meet the target. What evidence have they used to decide upon the actions they need to take? Examples of evidence could include good practice from elsewhere, local surveys, feedback from focus groups, information from partner agencies, and so on.

The following matrix has also been developed to score each target in terms of its contribution towards sustainable development:

3 = contributes totally to sustainable development

2 = contributes partly to sustainable development

1 = contributes little to sustainable development

**Our ambition** - Is to consult and engage with children, young people and their families in the development of facilities and extended day services which meet their needs, enable all to participate in the wider community and realise their potential. In particular we will develop family support services that promote the health, confidence and safety of all children and seek to reduce disaffection and tackle the underlying social causes of crime and anti social behaviour.

Quality of Life Indicator **18**: The percentage of half days missed due to total absence in a) primary and; b) secondary

Quality of Life Indicator **19** : The proportion of young people (16-24 year olds) in full-time education or employment.
